Lighting controls
FOR CONTRACTORS

Simple and scalable

We make it simple to design, quote, install and commission, giving contractors full control of the process. We're in this together, and we believe contractors are our partners.

Familiar installation

Installing Amatis devices is a familiar process and not complicated for electricians in the field. You expect to follow a wiring diagram for installing lighting fixtures, and the same applies for Amatis controls. Because our system is wireless, you'll have more freedom if wired circuits already exist in the space, with the ability to move controls and loads without re-wiring existing electrical branches.

Design and quote support

We'll design and quote your first projects for free - but Amatis Controls are so simple your estimators can design it themselves, and we are always there for review and to provide backup. Proposals include a reflected ceiling plan design that estimators can reference and electricians can reference later during installation.

Commissioning control

We give contractors the ability and training to handle commissioning directly, in three simple steps using the free Amatis Commissioning app from your phone, tablet or desktop. You'll have the ability to monitor and troubleshoot your sites from anywhere, helping you plan your warranty and eliminating the cost of call-backs.

Working with Amatis

We'd like to help you use Amatis lighting controls in your bids. This helps you get familiar with our devices, learn how to place them to place them and showcase the advantages of a low SKU count with flexible configuration.

Visit one of our demonstration sites, like Detroit Electrical Industry Training Center in Warren, where we can showcase installations in several rooms.

Schedule in-person or online training on Amatis basics, installation and commissioning with Technical Sales Manager Stuart Ogle, 313-462-9795 or stuandhiscrew@amatiscontrols.com.

Join our free commercial pilot, and receive a kit to install however you choose — in your office, conference room or warehouse.

amatis

Simple, capable lighting controls

Amatis wireless lighting controls are simple to install and commission, easy to integrate with building systems, code-compliant, and more cost- and energy-efficient than other options.

The Amatis 6LoWireless system uses the latest in the latest in wireless technology, a wireless mesh network, with the ultimate benefits of simplicity and scalability. Devices communicate with one another instead of communicating through central hubs. This approach extends the wireless range of each device, ensuring robust operation, and adapt the wireless communication to the shape and space of your building in a cost effective, and scalable manner.

Typical system cost*

Zone-based deployment
As low as $0.50/sq ft

Per-fixture addressable deployment
As low as $1.00/sq ft

Smart fixtures (individually addressable, sensors per fixture)
Average $3.50/sq ft at 1 fixture per 70 sq ft

Low-SKU count

Enable smart fixtures with ADVANCED LOAD CONTROLLER

Retrofit fixtures with SMART DRIVER

Monitor and control with COMMISSIONING APP + DASHBOARD

Detect motion, light, temperature and humidity with SENSORS

One-touch control with BATTERY OR WIRED SWITCHES

*Price estimates are for Amatis system hardware and do not include installation.
